

# H.O.P.E. Award– *“Challenges Me to Become a Better Student”*

## Dr. Brian Wargo

I couldn't imagine Wargo not receiving this award. Every day in class, not only does he open our minds with new concepts, but he also teaches us important life skills that we would need going off into college. He challenges me every day to be a better student, so he should definitely receive this award.

He always pushes you to do more than you need to and encourages you no matter what. He also cares about your future and helps you out with questions about college and wants to see you succeed and do what you want to do.
