FEATURES:

LOVING Literacy!

We know that early literacy pays tremendous dividends in students' life-long learning. The FAES staff did an *amazing* job at putting together Literacy Night 2022. Classrooms were filled with students reading, listening, crafting, collaborating, and even some dancing! It was a packed house to make an impact on literacy!

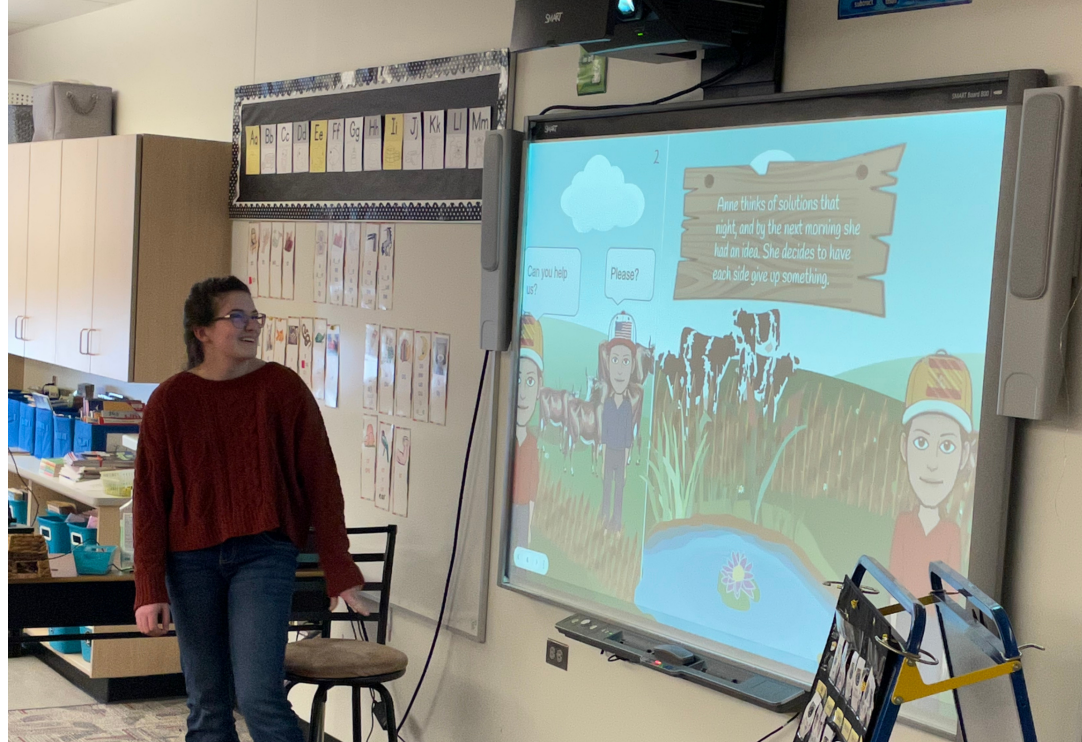

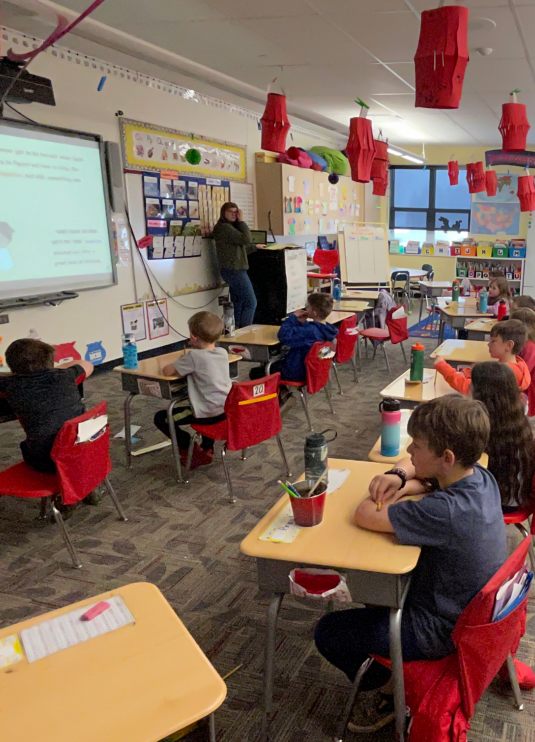

WILLIAM DEAL

Director of Teaching and Learning

FEATURES:

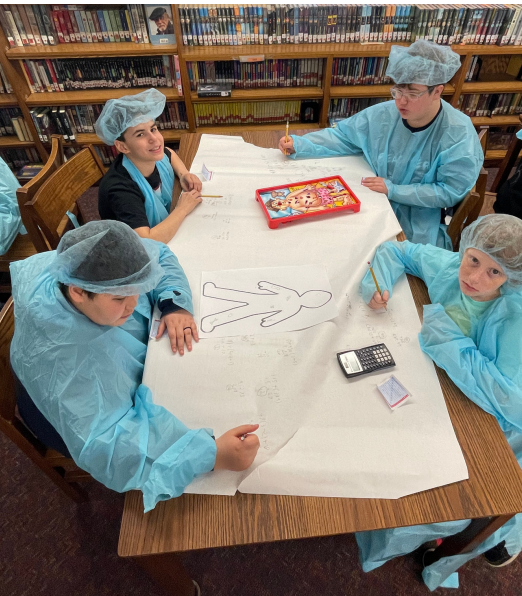

LOVING Literacy...through History

Students in Mrs. Porter's US History 2 class travelled to FAES to share children's books they had written with our second-grade students. This high school students were challenged to summarize historical events in a way that could be understood by their young counterparts. The second-graders provided feedback to the high school students after each book, while the ninth-graders loved having an authentic audience!

TEACHING GEMS:**Math Mania**

Our math teachers are working hard to make math come alive for their students. Mrs. Clibbens turned the FMS library into an operating room. Fifth-grade surgeons had to prove their prowess on PEMDAS! Meanwhile students in Mrs. Isanogle's geometry classes learned how they can use their knowledge of similar and right triangles to measure height of objects, demonstrating practical applications of their learning.

**INFORMATION:****Teaching & Learning Pulse Check**

Thanks to everyone for your hard work on your units and gap analysis efforts. To date, we've started over 100 units in EduPlanet 21. I'm working to compile our Gap Analysis data. I know some groups weren't quite finished with the full analysis. Please feel free to reach out to me with any questions on your Stage One unit plans or Gap Analysis!
